

# NEW PROGRAM!

## The Visionmaker: Envisioning 2010

January 16/17 — Toronto CANADA

***“What are your dreams, callings, important images, intuition, synchronistic events, and inspirations telling you about your emerging future?”*** —Patrick O'Neill

In today's world, vision – the ability to see the future – is our greatest asset and rarest commodity.

Begin the New Year reflecting on your vision for the next twelve months and beyond.

Join Patrick O'Neill for a deep dive into Visionmaking, the art and craft of envisioning your preferred future for work, relationships, health and the support you need to convert your dreams to reality.

This workshop will employ a variety of traditional and modern techniques, including visualization, journeying, reflective practice, and dialogue, to support you to:

- reflect on the accomplishments of the last 12 months and their significance and implications to the future;
- identify what is most heartfelt and important to you for the next 12 months and beyond both personally and professionally;
- make a personal plan to make your vision a reality;
- examine where the status quo is impeding your progress and how to make a breakthrough;
- ensure that you are not “all work and no play” in 2010, which is a recipe for burnout and the perfect way to make you very dull and boring;
- Provide tools and support for your future.

The Visionmaker: Envisioning 2010 is a program for anyone wishing to accelerate progress towards his or her preferred future.

**Connect with a powerful vision for your life and work.**
